

## QC Manager Syntagon AB

***Do you want to be part of a growing and developing business expanding with new products, new customers and presence at a growing international market?***

*Syntagon is a leading Scandinavia-based drug development and chemical manufacturing company. The company has capacity and know-how to assist clients from early discovery batches all the way through validation and into commercial manufacturing.*

*Syntagon provides the client company with all relevant supporting documentation together with the manufactured substance. Over one hundred biotechnology and pharmaceuticals clients have selected Syntagon for their development and manufacturing programs.*

### **The position**

The successful candidate will as QC Manager have responsibility for all QC matters at the site in Södertälje focusing on quality control concerning production of Life Science ingredients in the area of adjuvant ingredients, novel excipients, API's and Aesthetic products ingredients. You will be in charge of making sure that Syntagon AB meet expected quality standards whilst development and production perform efficiently.

The holder of the position will also coordinate different activities related to Quality Control Management over the site and contribute to the development of all quality work within the company. You will be responsible for instrumentation, facility and quality systems at the quality control laboratory. You will be training personnel on analytical instruments as well as establishing specifications and developing and validating new analytical methods. Your work will be carried out in accordance with GMP regulations and under GMP certification.

The candidate will have an academic degree with focus on analytical chemistry or chemistry or any relevant area. You must have experience from work with HPLC and GC. It would be a great advantage if you also have experience from work with Preparative HPLC.

You need to be able to act on own initiative and take own responsibility for making things happen, you shall demonstrate leadership abilities inspiring and co-ordinate others keeping everyone focused on the objectives. You must have analytical skills to quickly understand and analyse complex issues as well as being able to come up with sound and rational judgments. You shall demonstrate use of a methodical and systematic approach in your work. You must be able to communicate in a clear and structured way and manage to adapt to the audience.
